Bar|Scan® Sample Reports

The Benefits of Bar|Scan's Easy Reporting:

- Bar|Scan's easy to use, SQL based report generator means that you can create reports of your own design. Pop-up choices make creating new reports a snap. The report generator is built right in so there is no other software to learn.

- Choose any sort order, any column order, filters, page breaks and subtotal as needed. Rename format, and resize your columns. Add images or documents of your assets. Save your report at anytime for future printing.

- Preview and print your report or export in popular file formats including Microsoft® Excel and Word, PDF, CSV, delimited or XML.

Bar|Scan® v2.9.1 b01 1/9/2014   Page # 1

- Bar|Scan's Accounting Module includes depreciation history and lease schedules. Forecast depreciation with different methods. Information can easily be exchanged with your enterprise accounting system.

The Benefits of Bar|Scan's Intelligent Data Validation:

- We know that mistakes can happen during an inventory. Bar|Scan's Transaction Table captures your handheld inventory information for error checking and editing.

- Bar|Scan validates all of the inventory information that you collect using over ninety logical rules to maintain your database integrity. Bar|Scan's transaction validation feature can be configured to flag errors as serious, warning only, or ignore problem. Additional rules can be created. You are always in control.

Bar|Scan® v2.9.1 b01 1/9/2014   Page # 1

- This Transaction Report shows several easy-to-read error messages. Detailed descriptions on how to correct these errors are documented and listed by error number in the User Manual.
The Benefits of Bar|Scan's Data Collection Flexibility:

- You can choose the method of data collection that works best for you. You can download all of your assets into your handheld to verify, or just download lists, or scan Bar|Scan's barcode menus, or use your smartphone, tablet, or mobile computer's keyboard for free form data entry *or* any combination of the three.

- Using any of Bar|Scan's data collection methods means that all of your inventory team members will be working off the same standardized information to maintain uniformity of your collected data.

More Benefits of Bar|Scan's Reporting:

- Your reports can contain multiple sorts and subtotals. Subtotals can be customized with graphics and colors for easy identification.

- Any of your Bar|Scan reports can be printed as a detailed report, like the example below, or in summary form, when totals are all you are looking for. The difference is only one check mark.
