

**ZEBRA**

## **BAR|SCAN**

**Raise the bar on your asset management.**

## BarlScan shows you what you've been missing.

In today's warehouse and manufacturing operations, working lean is critical to maintaining tight margins. There's no room for error or loss, because the fixes require time and money.

You need visibility of your assets, so you don't waste time hunting for or replacing them. As your business grows, you'll spread into larger spaces with more equipment, tools, materials, and inventory to manage. With a strong asset tracking system, you can see what you have, where it is, the condition, and any maintenance that needs to be done. Relying on a manual spreadsheet isn't efficient or accurate enough.

[BarlScan](#) has the total solution to tightening your grip on asset management. We'll help you create and maintain a digital profile of every physical asset. You gain real-time insights, not a look back, so you can turn data into actionable tasks.

### BarlScan: Create a digital profile

Automated data collection technology has transformed business. A simple barcode enables a company to encode all the information it needs to identify and track a product, from its source to its current location.

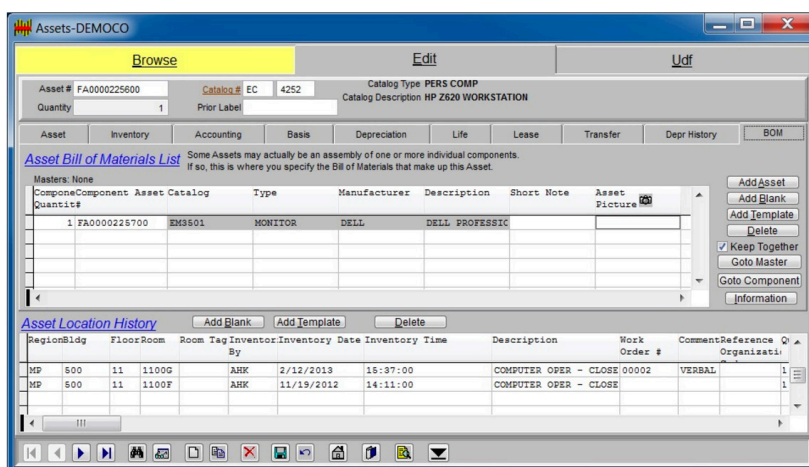

[BarlScan](#)<sup>®</sup> is the affordable inventory and asset management suite using rugged, handheld mobile technology with Wi-Fi and email connectivity. BarlScan makes it easy to create a profile for every asset, including location, date of purchase, cost, maintenance history, warranty, and other important data. For everything from computers and equipment to office furniture and high-value supplies, this complete solution delivers more accurate and efficient inventory counts and tracking.

The Windows-based program is designed to be user-friendly, with easy-to-follow menus and navigation. Browse, sort, add, or edit asset information, and print a report. You can also assign filters that prevent users from accessing assets beyond their area of responsibility.

The Windows-based program is designed to be user-friendly, with easy-to-follow menus and navigation. Browse, sort, add, or edit asset information, and print a report. You can also assign filters that prevent users from accessing assets beyond their area of responsibility.

Corporations like DreamWorks Animation SKG use BarlScan to track more than 23,000 pieces of animation equipment and specialized equipment. California's Department of Resources Recycling and Recovery (CalRecycle) was able to increase its asset tracking accuracy from 50% to 95% with the help of the total BarlScan solution.

# Zebra MC3200: The Asset Tracker

The [Zebra MC3200 mobile computer](#) provides the rugged reliability you need in an asset tracking tool. This hard-working handheld delivers enterprise-grade computing performance, like unparalleled barcode scanning of both 1D and 2D barcodes. With a scanning reach of up to 15 feet away, it's easy to capture barcodes on large assets that are out of reach.

The MC3200 offers all the features you need to scan barcodes, transmit data, and access your BarScan database:

- Fast wireless connectivity, with 802.11n
- Available in your choice of three lightweight, ergonomic styles
- Pre-installed with enterprise-grade Android
- Dual-core processor and substantial memory lets you run multiple complex applications simultaneously
- Tolerates multiple 5-foot drops and hundreds of 64-foot tumbles
- IP54 sealing protects against water and dust
- Push-to-talk and high-quality speakerphone included

The Zebra MC3200 mobile computer is part of the BarScan total solution from efficient, accurate asset tracking and management. [Contact BarScan](#) to learn more.
